PROFESSIONAL EXPERIENCE

Simform Software LLP / Ahmedabad, GJ

React trainee

January - April 2023

- I completed a four-month React JS training program at Simform, gaining hands-on experience in building modern web applications using the library. The program deepened my understanding of React's core concepts, and I learned to use tools like React Router and Redux. I developed collaboration skills and received valuable guidance and feedback from experienced mentors. The training has prepared me for a challenging role as a React developer.

WAYS Software / Rajkot, GJ

WEB Developer

Jun - November 2022

- Ways Software is a software company where I have worked as a web developer for 5 months. I received training for Three months there in basic languages and made some projects such as tech support software and a calculator of interest in PHP.

ACADEMIC

RK University / Rajkot, GJ

DIPLOMA In Computer Engineering

jun/2020 - April/2023

CGPA - 7.5

- Completed coursework in C++, Java, Python, PHP, CodeIgniter - 4 and Android Studio during my Academic.

PROJECTS

Expense Tracker React App

College Final Year Project

- I created an Expense Tracker React app that integrated two APIs - Chart.js and Speechly - to provide users with a comprehensive tool for tracking their expenses. With Chart.js, I was able to generate visual representations of a user's expenses, giving them insight into their spending habits and allowing them to identify areas where they could save money. With Speechly, I enabled voice-controlled functionality, allowing users to add new expenses by speaking.

Blog Website

5th sem Project

- I made a blog website where the user can view everyday news and articles.
- On this site, users can also post blogs by creating an account.
- In this web administrator has authorities like admin can make a user an administrator, then that user can also have rights to modify any posts on the site. Admin can Unpublish the post, so no one can view the post and the post is not deleted from the database.

Language Used : CodeIgniter4, php, bootstrap.

Interest Calculator Website

During Company Training at Ways Software

- Simple interest calculator where you can calculate the borrower's interest and obtain the full amount of money with interest.

Language Used : php, bootstrap.
